

Partnership Offer
Season 2020

AGH Racing Team

We are a team of ambitious and creative students from the AGH University of Science and Technology from Cracow. Since 2012 we have specialized in design and construction of Formula Student racing cars.

8 years of experience

**More than 100
talented students**

9 completed projects

Constant investments in the technical background and improvements of workflow management methods result in the upgraded racing cars' constructions and consequently better competition results and highly qualified engineering staff.

CARS

Presently our team develops two constructions - with combustion engine and electric drive. In the near future the number of cars will increase as we are about to present a new combustion racing car.

AGH RTC 6.0 "Grażyna"

AGH RTE 2.0 "Lem"

It is worth mentioning that we have been developing the autonomous system technology for 2 years now and we plan to implement it to the car in the upcoming months.

FORMULA STUDENT

**WORLD'S MOST PRESTIGIOUS
ENGINEERING EVENTS**

It is an international series of events during which university teams from all over the world rivalise with each other on real Formula 1 and NASCAR racetracks. Above else the Formula Student series is an engineering solutions contest that promotes innovation in the automotive industry.

At the moment there are 621 registered teams possessing combustion vehicle with 8 polish teams among them. As to the teams with electric cars, there are about 170 teams and AGH Racing is the only one from Poland.

OUR SUCCESSES
