

The background of the image shows two open-wheel race cars on a track. The car on the left is a single-seater with the number 1 and various sponsor logos including 'CAGIVA RACING', 'SUPERIOR INDUSTRIES', 'CHAMPLANT', 'AGH', 'NGK', and 'MASTERMODEL'. The car on the right is a more complex, multi-seater vehicle with a GoPro mounted on its roll-over protection structure. A diagonal graphic of the Italian flag (green, white, and red stripes) runs from the bottom left towards the top right, partially obscuring the cars and the text.

PARTNERSHIP WITH AGH RACING

2023 SEASON

WE ARE AGH RACING!

AGH Racing is a Cracow racing team taking part in the international Formula Student series, considered to be the most prestigious engineering competition in the world. Our task is to design and construct racing cars from scratch in accordance with the demanding regulations of the series.

Since 2012, we have been successfully competing in the most important competitions around the world, and thanks to the fruitful cooperation with the academic community and representatives of the business world, we are constantly developing our technical and training facilities, which results in increasing competences of engineering staff and victories in competitions.

As one of the few teams of this type in the world, we develop three technologies in parallel: combustion, electric and autonomous. Moreover, we are the first team in Poland to build an electric car and an autonomous car, which shows that we have become the innovation leader among Polish students.

AGH Racing at Formula Student Spain 2019 competition

FORMULA STUDENT

An international series of competitions, during which student constructions from the best technical universities from around the world compete with each other on tracks known from Formula 1 or NASCAR. Apart from the sporting aspect, it is primarily an engineering solutions competition. The competition is a field for advertising for the largest automotive concerns and for recruiting the best engineers from among students.

Formula Student focuses on promoting innovation in the automotive industry. The competition is divided into a part of static competitions,

during which the applied engineering solutions are evaluated, costs are justified and the business way of managing the team is promoted, as well as creativity in obtaining financing sources and designing business models is encouraged.

In more spectacular dynamic events, the cars are tested under track conditions. The 5 competitions test the acceleration, grip, cornering behavior, reliability and economy of the cars.

Race cars at FS Spain

2013 - RTC 1.0 „GRUBA BERTA”

2015 - RTC 3.0 „BESTIA”

2018 - RTE 1.0 „STANISŁAW”

2021 - RTC 7.0

COMING SOON - RTE 3.0

2014 - RTC 2.0 „PEKATA BERTA”

2017 - RTC 5.0 „GRAŻYNA”

2019 - RTE 2.0 „LEM”

2022 - RTD 1.0

During over 10 years of our activity, we have managed to complete a total of 10 projects, including 7 cars built from scratch. Recently, this group also includes the first autonomous

car in Poland, which we built on the basis of our previous electrician RTE 2.0 "LEM". The development of this system took 3 years of hard work of the entire team. It is not without

a reason that the construction of a fast and technically advanced car is an interdisciplinary project involving over 120 people - students of all AGH UST faculties.

RTE 3.0

At AGH Racing, we never rest on our laurels, so after building the first Polish autonomous car, we started intensive work on our next construction. RTE 3.0, because we are talking about it, once again paves the way to unknown to us and challenges us to build an electric car with a 4x4 drive, for the first time in our history based on a full monocoque composite self-supporting structure!

The effects of our work can be expected soon!

RTC 7.0

Acceleration

3s do 100kph

Power

98 HP

Weight

198 kg

The fastest in our history

The latest RTC 7.0 combustion vehicle made its debut in 2021. It is distinguished by the use of a composite superstructure - the monocoque - ensuring low weight and high stiffness. In 2021, the car has been presented on tracks in the Netherlands, Austria, Spain and Italy.

Passion and continuous development are the key to success

AGH Racing successfully takes part in international engineering competitions, conquering racing tracks around the world. Through the implementation of passion in advanced, interdisciplinary projects with a strictly practical orientation, we gain valuable experience and have excellent conditions for continuous development. Recent years in the history of the team were full of successes. AGH Racing won competitions at events in Australia, Spain and the Netherlands, and stood on the podium of competitions in Michigan.

OUR SUCCESSES

2022

Formula Student Czech '22

- 1st place in Business Plan Presentation

Formula Student Spain '22

- 4th place in Trackdrive

2021

Formula Student Spain '21

- 3rd place in Acceleration
- 3rd place in Business Plan Presentation

2020

Formula SAE Australasia '20

- 1st place in Design
- Leap Award for the best simulations

2019

Formula SAE Michigan '19

- 3rd place in Acceleration
- 15th place overall out of 139

2018

Formula SAE Michigan '18

- 4th place in Business Plan Presentation
- 5th place in Skid-Pad
- 9th place overall

Formula Student Spain '18

- 1st place in Acceleration

Formula Student Netherlands '18

- 1st place in Acceleration
- 2nd place in Autocross
- 2nd place in Skid-Pad

Visible not only on the track

AGH Racing regularly takes part in the most important automotive and technological events organized by the academic community and related to the broadly understood automotive industry. As the only team in Poland, AGH Racing has been participating in

Formula Student competitions organized during the summer season continuously since 2013. The range of events with the participation of the team is complemented by fairs, conferences and automotive events, at which we appear many times promoting the team's partners.

Formula Student Competition

- FS Spain
- FS Netherlands
- FS Austria
- FS Czech
- FSAE Italy
- FSAE Michigan
- FSAE Australasia

Automotive events

- MotoWOŚP
- Hill Climb Limanowa
- Verva Street Racing
- Moto Show Katowice
- Formula Student Tatuus Cup
- Malopolska Festival of Innovation

AGH UST Open Day 2019

Conferences and trade fairs

- Poznań Motor Show
- Kompozyt EXPO
- Dell Technologies Forum
- Oper8IT Conference
- Solid Expert Conference
- FORMNEXT Frankfurt
- Innoform Bydgoszcz

Academic events

- Rollouts of racecars
- AGH UST Open Day
- Student Organizations Fairs
- AGH Brainstorming
- Engineering Job Fairs
- BITEHack

THE OFFER

In response to the constantly changing realities, we try to meet the needs of our partners and constantly adjust our offer so that it remains attractive to both current and new supporters.

Proportional to the value of support, our team may propose appropriate marketing benefits for the partner. We are also open to any suggestions not included in our offer.

Three benefit packages, SILVER, GOLD and PLATINUM, guarantee effective brand promotion in the academic environment and the industry group involved in events with the participation of the team.

Example of benefits

SILVER

- Placement of the company's logotype on the website
- Placement of the company's logotype in promotional materials
- Use of the Team's image for the company's marketing purposes
- Acknowledgement on the Facebook fanpage

OR

- Placement of the company's logotype on the race car

GOLD

- Presentation of the company's logotype on Team's spots and photos
- Mention of the partner's page under each Facebook post
- Placement of the company's logotype on Team's clothing
- Placement of the company's logotype on the race car
- All benefits from the SILVER package

PLATINUM

- Placement of the company's logotype on calendars
- Car rental for company's events or trade fairs
- Joint promotional recordings on social media
- All benefits from the SILVER and GOLD packages

The most popular student construction team in Poland

We are present on all major social networks, attracting new followers every day. We regularly publish materials from the life of the team, share our knowledge and promote the activities of our partners. The participation of AGH Racing in unusual promotional campaigns and events each time generates the reach of posts counted in tens of thousands of people.
